

#### OBJECTIVES

- 1 - Contribute to the analysis and formulation of public policies that promote sustainable energy development.
- 2 - Cooperate in the setting up of agreements that enable self-sufficiency and draw a roadmap towards the diversification of the energy matrix, increasing the participation of clean, nuclear and renewable energy.
- 3 - Articulate processes of dialogue between social, political, business and institutional actors, to build consensus for the realization of sustainable energy projects.
- 4 - Collaborate with the strengthening of technical and management capacities of organizations involved in Argentine and regional energy development.
- 5 - Contribute to the access to information, public awareness and the development of management skills of the different levels of government in terms of energy sustainability and its dimensions: social, economic and environmental.
- 6 - Facilitate the mobilization of key players to promote sustainable development, the application of eco-efficient technologies, and make methodological contributions to the development of risk management strategies in the territory.
